

What Is It?

Let's Go Learn's *LGL Pre-Algebra Edge* is a powerful web-based learning system designed to give students the extra edge they need to successfully begin Algebra I. Combining powerful online pre-algebra assessment with supplemental pre-algebra instruction, *LGL Pre-Algebra Edge* offers up to 60 levels of instruction in pre-algebra skills. *LGL Pre-Algebra Edge* is a full math review of grades 1 to 7+, from basic math to pre-algebra and geometry. *LGL Pre-Algebra Edge* rewards students frequently with positive feedback as they move ahead. Teachers can monitor each student's progress and repeat assessments to clearly show advances in learning.

How It Works

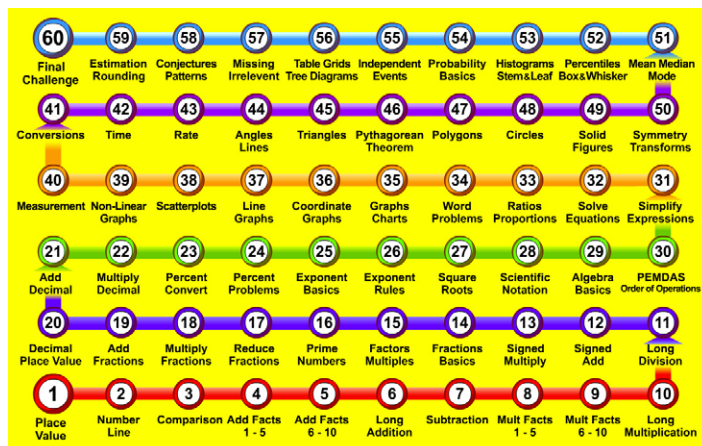

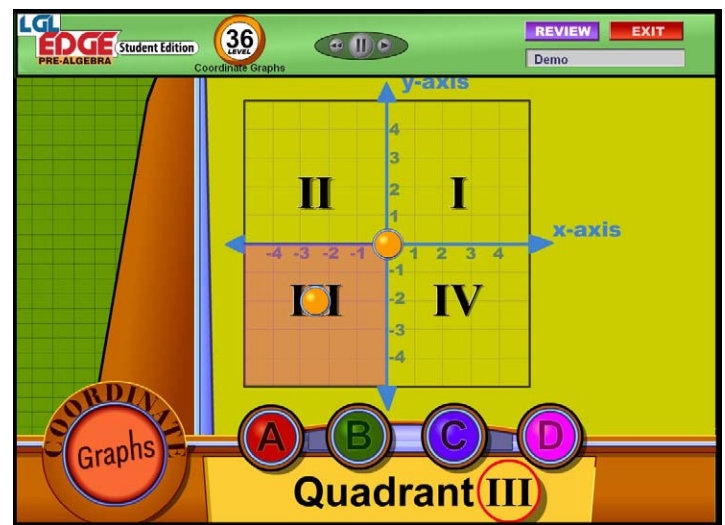

Let's Go Learn's *Diagnostic Online Math Assessment: Pre-Algebra (DOMA: Pre-Algebra)* serves as the foundation for *LGL Pre-Algebra Edge*. *DOMA: Pre-Algebra* diagnostically assesses students across 14 different areas of math knowledge that teachers consider essential for success at the Algebra I level, adapting to students as they respond to each question in the online program. Immediately after the assessment, students who qualify for instruction are automatically transitioned into powerful online pre-algebra lessons addressing only the skills that each student requires.

With the *LGL Edge Series*, students complete only the lessons they need without wasting time on materials they have already mastered. This is very important for secondary and adult students who are already struggling.

What Makes It Unique:

When secondary or adult students are grade levels behind in math, it takes a special product to help bring them up to grade level. *LGL Pre-Algebra Edge* is designed with high-interest materials including songs, video, and games, with an emphasis on contemporary, teenage/young adult culture, to engage and encourage them in the classroom. *LGL Pre-Algebra Edge* is part of the *LGL Edge Series*, a complete assessment and instructional solution for these older learners.

The *LGL Edge Series* doesn't offer bland instruction and drill-and-kill practice, but instead provides exciting, interactive lessons, detailed step-by-step feedback on student practice, and a motivation system that encourages students to turn failure into success!

▲ Based on *DOMA Pre-Algebra*, individual lessons are selected for each student, making *LGL Pre-Algebra Edge* a truly differentiated instructional solution for each student.

◀ Real-time scoring allows students to get immediate feedback and encouragement. Students are motivated to reach “silver” and “gold” levels across 60 lessons. Sections can be reviewed in order to focus on areas of difficulty.

Who Is It Useful For?

LGL Pre-Algebra Edge is ideal for students who are below grade level in math, who have gaps in math skills, or who are at risk of failure in math. *LGL Pre-Algebra Edge* can be used for students with or without special needs, adult students, or even ELL students with an English reading ability at or above the fourth grade level.

▲ Explicit instruction with integrated songs and melodies keeps students engaged and motivated. The gaming interface also keeps students on track to attain more points as they participate in lessons.

Why LGL PreAlgebra Edge?

- 60 focused lessons, targeting pre-algebra skills for middle and high school students.
- Built upon a true diagnostic assessment, program targets the specific gaps of each student in pre-algebra.
- Highly engaging lessons that motivate students to succeed.
- *DOMA Pre-Algebra* assessment data ensures that teachers can individually plan for each student's needs beyond *LGL Pre-Algebra Edge* or any other Let's Go Learn supplemental instruction.
- Easy to use for teachers and students and 100% web accessible.

An OAASIS™ from Traditional Assessment

Administrators and teachers who need relief from time and labor-intensive assessments now have a solution. *OAASIS™*, Let's Go Learn's Online Adaptive Assessment System for Individual Students, is a proprietary technology-based platform that simultaneously tests and reports on multiple skills while adapting to each learner's individual ability in real time as a human would. *OAASIS* serves as the foundation for all Let's Go Learn's assessment and instructional solutions.
