

# Case Study

## Learning Curve Education Center

"The Let's Go Learn assessment tool is excellent and easy for children to take. The reports are very parent-friendly and easy to understand. Unique Reader, the instructional portion of the program, can be used very effectively in classrooms since it differentiates to each student's specific needs. The lessons are also well-executed."

Customer Profile	
Product Used	Unique Reader (includes DORA)
School	Tutoring Center
Class Size	12
Deployment Type	Remedial reading
Benefits	- Easy diagnosis - Effective online reading instruction - Easy teacher control and monitoring
Results	- Measured growth in students

### Challenges Faced:

*What problems were you hoping to address using Let's Go Learn products?*

Since this program targets sight words, phonics, vocabulary, and comprehension, it helps my students improve their reading skills. The individualized learning path (Unique Reader) provides students with lessons that address their weaknesses.

*Which of our products do you use?*

I use Unique Reader, which provides both the diagnostic online reading assessment (DORA) and targeted online instruction.

### Strategies Implemented:

*How has Let's Go Learn helped your instructional practices?*

I own a learning center; therefore, each child is taught on an individual basis. The Let's Go Learn Reading Assessment is instrumental in helping me remediate my students. The parents and schools love the reports that are generated after the assessment. The "teacher report" helps me to pinpoint the gaps a student has in learning to read so that I can direct my instruction exactly to those areas.

*How often do you use Unique Reader's online instruction?*

That depends on the number of times per week a child attends, but all students generally use it at least once a week or more. Once a child has taken the Let's Go Learn Reading Assessment, I use it almost every time the child comes to the learning center as a supplemental instructional tool.

### Results:

*Have you seen growth in your student(s) as a result of using Let's Go Learn's products?*

My center has only been open for 8 months; however, the students who have been here long enough to re-test have shown growth. For example, one of my students took the assessment again after using the online instruction for 3 months. Her sight word and comprehension scores went up over one year!!
